-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 May 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Request for Interference

1. Applicant is reminded that the request for Interference has been placed in the file and will be considered when the claims in the instant application becomes allowable.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 27 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Roberts (5498455).

Roberts relates to a lamination product (figure-3) comprising a substrate (M) having pressure sensitive adhesive (PSA) (AD + LAD) material on one side, a release material (118) covering a first portion of the one side and exposing a second portion of the one side. A transparent laminate (54) secured to the substrate at the second portion of the one side, a portion of the laminate covering the first portion of the substrate and not being adhered to the substrate due to the release material. The release material is folded to expose the second portion as shown in figure-3.

Roberts also releases to a method for laminating a document comprising the steps of placing a document (P) between the laminate and the substrate, removing the release material to expose the PSA material on the first portion of the substrate and pressing the document and laminate against the exposed adhesive of the first portion.

The intended use phrases such as "can be", etc. have not been given patentable weight because said phrases are not found to be of positive limitations.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Roberts in view of McVoy (3827726).

Roberts, as discussed above, fails to teach that the document is smaller than the first portion of the substrate. McVoy relates to a lamination product comprising a transparent covering that is secured to the substrate around all outer edges of the document (figure-3) and the document (18) is smaller than the first portion of the substrate. Therefore, it would have been obvious to one having ordinary skill in the art to utilize McVoy's teaching of providing a smaller size document in the invention of Roberts with the motivation to provide protection to the document from the environment.
